

Education

Amendment 5 would take \$11 billion from our education system, but it only identifies \$4 billion in replacement revenue from a penny sales tax increase. *Where would the other \$7 billion come from?*

Bait & Switch

Amendment 5 promises a tax cut of around \$9 billion, which would actually be worth \$7.4 billion after the IRS takes their 18%. The amendment also require \$11 billion in spending to hold education harmless, which *would mean \$3.6 billion, or \$200 more per person, in new spending (new taxes).*
